Experience

TIAA, Staff Software Engineer

Sep 2025 – Present — Charlotte, USA

- Architected a **RAG-based AI assistant** using **Pinecone vector search** for natural-language querying of engineering feature requests, serving **20,000+ daily users** and reducing response time by **50%**.
- Managed a team of **6 engineers** to build an **AI-driven vulnerability intelligence pipeline** using **.NET microservices** that analyzes **JFrog scans** and **CVE feeds** to alert product owners of critical risks.
- Led the integration of **Azure Entra Single Sign-On (SSO)** for a mission-critical **ASP.NET Core & Angular** platform used by **2,000+ internal users**, replacing legacy NTLM authentication and improving enterprise identity security.
- Designed and implemented a centralized **Unit of Work (UoW)** pattern enforcing **atomic transactions** and **data consistency** in an internal engineering platform.
- Standardized **Cursor**, **GitHub Copilot**, and **Claude Code** across a 6-person engineering team, accelerating delivery pace and reducing time spent on repetitive development tasks.
- Established **Test-Driven Development (TDD)** practices and built a unit-testing framework using **xUnit**, **Moq**, and **FluentAssertions**, increasing automated test coverage from **~20% to 90%**.

Bank of America, Senior Software Engineer

Mar 2024 – May 2025 — Charlotte, USA

- Led the design and development of a **Blazor-based enterprise analytics platform** supporting stress-testing workflows for risk and compliance teams, improving analyst productivity by **17%** compared to the previous quarter.
- Diagnosed production performance issues using **WinDbg** and memory **dump analysis**, optimizing data-processing pipelines and improving reporting workload performance by **25%**.
- Automated **cloud infrastructure provisioning** using **Terraform**, integrated APIs through **Azure API Management**, and implemented monitoring with **Splunk**, improving deployment reliability and enabling centralized API observability.
- **Mentored junior engineers** through code reviews and design discussions, improving code quality and accelerating feature delivery across the team.

TechSudoku LLP, Co-Founder

Jul 2022 – Nov 2023 — Remote, USA

- Founded and led a cross-functional engineering team building a **cloud-native SaaS platform** using **ASP.NET Core**, **Angular**, **Docker**, and **Terraform**, reducing operational costs by **42% (\$92K annually)**.
- Architected a **real-time call analytics pipeline** using **Apache Kafka** and event-driven microservices to process live call events, enabling real-time operational insights for customer-support teams.
- Developed an **AI-powered support chatbot** using **Python** and **OpenAI LLM models**, integrated into the call-center SaaS platform to automate customer query resolution, handling **300+ customer queries daily**.

Volvo Group, Software Engineer Intern

May 2023 – Aug 2023 — Greensboro, USA

- Migrated legacy **ASP.NET** apps to **Azure App Service**, improving scalability and reducing infrastructure costs by **59%**.
- Engineered **event-driven microservices** using **Azure Functions** and **Azure Service Bus** to generate and process **Vehicle Identification Numbers (VINs)** for manufacturing workflows.

Microsoft, Software Engineer II

Feb 2020 – Jul 2022 — Hyderabad, India

- Created **AppLens detectors** using **Kusto Query Language (KQL)** to analyze telemetry from the **MDM metrics platform**, enabling automated diagnosis of production issues across **Azure App Services**.
- Partnered with multiple Azure product teams to deliver **Quick Fix Engineering enhancements** and migration tooling, reducing support cases by **43%**.
- Resolved critical production incidents for enterprise customers by analyzing **memory dumps using WinDbg**, troubleshooting complex failures in applications hosted on **Azure App Services**.
- Delivered advanced (**300+ level**) internal engineering training on **CLR internals**, **ASP.NET**, **IIS**, and **Azure debugging** to Microsoft's global support teams.

KFin Technologies, Software Engineer

Jan 2017 – Jan 2020 — Hyderabad, India

- Built a government staff-management platform using **ASP.NET Core** and **React** used by **5,000+ employees**, reducing administrative errors by **40%**.
- Designed **real-time workforce tracking** using **SignalR** and **WebSockets** supporting **1,000+ field agents**, improving task completion by **30%**.

Skills

Languages: C#, Python, Java, TypeScript

Backend/Cloud: ASP.NET Core, REST APIs, Microservices, Azure, AWS, Docker, Kubernetes, Terraform.

Data/Distributed: Kafka, Event-Driven Systems, Redis, PostgreSQL/SQL Server, MongoDB, Pinecone, Splunk, Prometheus.

AI/Engineering: RAG, Vector Search, Azure OpenAI, Cursor, Claude Code, Debugging (WinDbg), Performance Optimization.

Education

M.S. Information Technology, University of North Carolina at Charlotte

Aug 2022 – Dec 2023

Certifications

• Azure Fundamentals 

• Azure Data Fundamentals 

• Azure AI Engineer Associate
